

Setting up Zapier

STEP 1

Set up a Zapier Account at www.zapier.com & write down the log in credentials - I'll need these! *****IMPORTANT***** You **HAVE** to verify your email address before moving on to the next step. **Right now**, check your email, click that verify email link Zapier sent you **AND IMMEDIATELY LOG INTO ZAPIER**. If you don't log into Zapier after you verify your account, it won't work.

Please do not send me your Zapier info without confirming AND logging back into Zapier. If I start setting up your account and your email is not verified, it will cause your account to get bumped back to the bottom of the list, which will add another 3 business days to your waiting time.

Sign up for the “Starter Plan” for \$29.99.
